EDUCATION

Columbia University

New York, NY

B.A. Computer Science; Special Program in Public Health

May 2026

Honors: Columbia Undergraduate Scholars Program, NYC HAQ Hackathon 1st Place, NYUAD Hackathon 2nd Place

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, SQL

Generative AI: LLMs, Multi-Agent Systems, Agentic AI Workflows, Prompt Engineering

Machine Learning: XGBoost, Keras, SHAP, Model Evaluation

Data Analysis & Visualization: pandas, NumPy, matplotlib, seaborn, R, Tableau Public, Looker (Google Certified)

Databases & APIs: PostgreSQL, REST APIs, Flask

Certifications: Salesforce Agentblazer Champion (2026)

WORK EXPERIENCE

Northeast Big Data Innovation Hub, Data Science Institute at Columbia University

New York, NY

Assistant

December 2024 – May 2026

- Designed and built 5 end-to-end data science curriculum notebooks for the Northeast Big Data Innovation Hub (Columbia University) and the National Student Data Corps (NSDC), covering Nutrition Obesity in Latin America (WHO API), Quantum Computing (Qiskit), Auditing AI in Criminal Justice (COMPAS/SHAP/algorithmic bias), Customer Churn Prediction (XGBoost, Keras, SMOTE, IBM Telco dataset), and Ethical Responsible AI; globally accessible, self-serve projects guiding students through full pipelines in Google Colab.
- Prepared quarterly analytics reports covering social media performance, engagement metrics and program participation
- Facilitated workshops on advanced SQL and Excel for MS Data Science students
- Designed and automated JavaScript-based workflows to reduce manual data handling across recurring operational tasks
- Created instructional materials focused on data science in real life, translating different applications of data science into educational sources

Columbia Irving Medical Center

New York, NY

Assistant

November 2024 – April 2025

- Analyzed data from the Genelift study, a validated genetic literacy assessment tool, using Python and R to support the development of a Spanish-language adaptation.
- Applied statistical and data analysis techniques to evaluate patterns in participant responses and inform instrument translation and cultural adaptation.

Center for the Advancement of Languages (CALEC) - Education Nonprofit

New York, NY

Intern

June 2023 – August 2024

- Collaborated on UX and product development for a K–12 bilingual language learning platform, documenting user workflows, identifying usability improvements, and creating structured resources to support platform adoption across diverse learning communities.

PROJECT EXPERIENCE

AgentCRM | Python

- Built a multi-agent Python pipeline that automatically classifies, responds to, and escalates customer support tickets across 5 categories (billing, bug, feature request, support, account)
- Designed a modular sequential agent architecture (Classifier, Responder, Escalation) enabling independent iteration on each stage
- Engineered escalation logic using priority and urgency signal detection to route high-risk tickets for human review; designed roadmap for sentiment-aware tuning and a lightweight RLHF feedback loop

Ad Auction Fairness Engine | Java, Apache Kafka, Spring Boot, PostgreSQL, Docker, AWS EC2

- Built real-time analytics pipeline auditing programmatic ad auctions for demographic bias, motivated by Sweeney (2013)'s research on discriminatory ad delivery; processed 100+ bid events/second and persisted auction results to PostgreSQL for downstream reporting
- Designed automated fairness monitoring layer running demographic parity and predatory ad targeting checks after every auction window; flagged violations exceeding 15% disparity threshold and surfaced bias patterns across age, gender, and income demographics for stakeholder review
- Exposed analytics via REST API (4 endpoints) reporting fairness metrics, flagged advertisers, and predatory ad distribution; deployed on AWS EC2 via Docker and resolved data integrity issue by correcting Kafka partition key logic

ADDITIONAL SKILLS & INTERESTS

Languages: Proficient in Spanish & French; Working proficiency in Portuguese; Basic proficiency in Mandarin

Interests: LLMs and Agentic AI Systems, Data for Good, Education
